What Is DuraDeck?

- A temporary composite mat used to create roadways and work platforms
- Use anywhere you would lay down plywood
- Durable mats that last for years and protect sub-surfaces
- Save time and money by preventing post-work ground remediation
- Improves safety by creating stable worksites
- Use over wet, muddy, grassy, and sensitive surfaces
- Easily get heavy equipment to worksites

Where to use DuraDeck

- Construction Sites
- College/School Campuses
- Cemeteries
- Parks
- Golf Courses
- Front/Back Yards
- Transmission Projects
- Landscaping Projects
- Outdoor Special Events
- Arborists/Tree Care Projects
- Structural Movers
- Water Driller/Pump Projects
- Septic Tank Projects
- Over Concrete

“DuraDeck ground protection mats saved us a tremendous amount of time and effort.”

–PAUL FLEMING, FOREMAN
Frequently Asked Questions

**Where do I use DuraDeck?**
Anywhere you have ever used plywood. Use over any unstable, wet or sensitive surface.

**How much weight will DuraDeck hold?**
80 tons on a firm subsurface, but as a general rule DuraDeck supports 250 psi.

**Why is DuraDeck better than plywood?**
DuraDeck lasts longer, distributes weight better, will not splinter/crack, will not absorb water or contaminants, and is much stronger.

**How long will DuraDeck last?**
DuraDeck is extremely durable with a 7-year warranty. DuraDeck can be cleaned and easily transported for multiple uses.
